

nGimatSM

nanoEngineered MaterialsSM

nGimat LLC Project Engineer Dr. Stephen Johnson will present the company's latest developments on ceramic sintering at the 10th Pacific Rim Conference on Ceramic and Glass Technology (PACRIM 10) in San Diego in June 2013. Dr. Johnson is the Principal Investigator on a Small Business Innovation and Research (SBIR) grant administered by the U.S. Air Force, through which he and the nGimat LLC team developed a new method to sinter ceramic coatings onto metal surfaces. The presentation will discuss the novel aspects of the new technique, as well as plans for the development of a prototype R&D sintering system in the coming years. Inquiries regarding the new technology can be directed to Dr. Johnson at sjohnson@ngimat.com.
